RFNC-VNIITF was visited by specialists involved in preserving the legacy of the nuclear industry

On October 31, specialists involved in preserving the heritage of the nuclear industry visited RFNC-VNIITF. As part of the World Day of Audiovisual Heritage, more than forty participants visited the Museum of Technology and Engineering of the Mayak Federal State Unitary Enterprise (Ozersk) and the exposition of the RFNC-VNIITF Museum (Snezhinsk).

The seminar covered topics of cataloguing scientific, technical and other collections of industry museum objects, the use of new audiovisual solutions in museum exhibits, working with different groups of museum audiences and much more.

RFNC-VNIITF employees Olga Prikhodko and Elizaveta Suprun also took part in the event. E. Suprun:

"The seminar was very interesting and fruitful! We saw many new solutions, exchanged experiences with colleagues. We adopted some ideas that we plan to use in the exposition of our museum." O. Prikhodko: "I would like to note that such scientific and practical seminars are held annually by the Historical and Cultural Center of the State Corporation. Their importance for us cannot be overestimated. My colleagues and I discuss not only new methods of work, but also the difficulties we face, any tasks. Such meetings inspire us very much!"
